## **Specialist in design and manufacturing of electronic components**

Since 1966, we have been developing and manufacturing electronic components with European technology.

We offer competitive prices and we stand out for flexibility and customer collaboration.

With a background of more than 55 years of experience and day-to-day knowledge of the requirements of electronics manufacturers, we offer a comprehensive range of products under the same brand name.

A task that we carry out with a close and committed team which ensures excellent results for even the most demanding professionals.

**We innovate  
for you.**

## Part of a leading Group

We are part of Mondragon Corporation, the foremost business group in the Basque Country and seventh in the ranking of Spain's largest businesses.

Mondragon Corporation employees more than 81,000 people, and includes more than 200 companies, 1 university, 14 technology centers, 8 educational centers. Mondragon Corporation is structured in three large groups: FINANCIAL, INDUSTRIAL and DISTRIBUTION, which operate independently within the framework of a common strategy..

We innovate  
for you.

sales in more than  
**150 countries**

## Semiconductors

**We guarantee a quick and efficient response.**

We offer a wide range of diodes covering different ranges of powers and voltages, both axial and radial formats as surface mount (SMD), to meet the needs of manufacturers. From rectifiers, ultrafast and Schottky until zener diodes, bridge rectifiers through, transient suppressors ...

We also offer thyristors with high immunity to electrical noise and false alarms, a wide range of formats, including axial, radial and surface mount (SMD).

## EMS

**The value of providing competitive advantages.**

We offer a wide range of services in the electronic industry area

Adjusted, flexible and with innovative vocation, we provide a quick response, customer oriented and excellent in quality and service.

The will to understand our customers and connect with their needs has led us to offer a wide range of services in the electronic industry area for the following sectors: Automotive, White Goods, Telecommunications, Industrial Electronics, New Energies, ....

## TV Reception

### From the antenna to the socket.

Design and development of equipment and solutions for all types of telecommunication infrastructure.

We offer a wide range of innovative products for TV distribution, from the antenna to the socket and Hospitality, advanced multimedia services in every room of the hotel.

## Smart Data Services

### Connected global services for localisation and decision making.

Whether it is a fleet of vehicles, a merchandise, or the information that circulates through the vehicle, we offer you an optimal solution for each business, fully adapted to your needs.

**Flotasnet.** A web platform created for professionals who need information for the control, management and optimisation of their mobile resources.

**Ubika.** The platform for the management of the supply chain of manufacturers and logistics operators.

**SmartDataCar.** The perfect platform for vehicle manufacturers, dealers, rental companies, maintenance, and all those who wish to manage vehicle data.

## New Business

We seek to generate the businesses of the future.

Development of innovative, manufacturing-oriented solutions in the field of automotive, aeronautics and energy.

The aeronautics sector is characterised by high demands in terms of quality levels, and Fagor Electrónica is backed by the EN 9100 and EN 9110 certifications.

The electronic systems used in this sector are characterised, among other factors, by their high demands in terms of reliability, quality, safety and technology. Fagor Electrónica is prepared to respond to these needs.

## Our customers

## Meet the highest Quality Standards

## A global brand

## Our people, our greatest value

A different company, focused on people. We are a cooperative formed by people committed to the client and the market. As a cooperative, we trust and believe in people. We are approachable, like to listen and are open to change.

## Committed to Environment

The quality, environmental and safety policy is the result of reflection on the cooperative's strategic Objectives, it involves the entire staff and it is conducted by the Management.

Customer orientation to achieve their complete satisfaction, based on knowledge about their needs and expectations and meeting their requirements. Identify and meet the legal and regulation requirements that affect us. Work on the basis of objectives and results, deploying and reviewing them to make them easier to understand and be taken on board by the entire workforce
